	**What is the Vaccine**
	There is **no medicine** that can **get rid** of **Coronavirus**
	A **Vaccine** is a special type of **medicine** that can help to **stop** you from getting **very poorly** if you catch a virus, like the Vaccine we can have for the flu
	There is a **new Vaccine** that will help **stop** people from getting **very poorly** with **Coronavirus**
	The Vaccine has been **tested** to check it is **ok** to **give to people**

	**How the Vaccine works**
	The **Vaccine** might **not** stop you from getting Coronavirus
	The **Vaccine** will teach your body to **fight Coronavirus**

	This will **stop** the virus from **growing stronger** and will help **stop** you from getting **very poorly**
	The **Vaccine** will **help** to stop vulnerable people from getting **very poorly** if they get Coronavirus
    	This will mean • **Not** as **many people** will need to go to **hospital** • **Hospitals** will have **more beds** for other people who are poorly • **Lockdown** will get **easier**
	The **Vaccine** will **not** • **Give you Coronavirus** • Make you **poorly** with **something else**
